Recipient

Respected Sir / Ma'am,

I am writing to express my interest in the acquiring an internship at your company. As an undergraduate student at SRM University majoring in Computer Science Engineering with specialization in Information Technology, I have developed a strong foundation in programming and Machine Learning skills through coursework and hands-on projects. My experience in Ear based - Biometric Project allowed me to hone my skills in Machine learning and Database Management, which I believe will be beneficial for this role.

During my internship at AIESEC in Chennai, I gained practical experience in entrepreneurial and leadership developmental leadership skillsets. I was responsible for promoting the opportunities provided by AIESEC in more than 126 countries and organizing various events for revenue generation, where I learned to proficiently communicate and lead a set of individuals. This hands-on experience has equipped me with the ability to adapt to any specific role, aligning well with the requirements of the internship at your company.

I am particularly drawn to your company because of the intent to promote knowledge and experience to the next generations, and I am excited about the opportunity to contribute to your innovative organization. Thank you for considering my application. I look forward to the possibility of discussing how my background, skills, and enthusiasm can contribute to your team.

Sincerely,

Harish Radhakrishnan
